JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS
VOLUME 66, 31 JANUARY 1996

Proceedings of the Sixth International
Congress on Computational
and Applied Mathematics
July 26–30, 1994, Leuven, Belgium

CONTENTS

Preface 1

INVITED PAPERS

C. Brezinski and A.C. Matos
A derivation of extrapolation algorithms based on error estimates 5

A. Sinap and W. Van Assche
Orthogonal matrix polynomials and applications 27

P.J. van der Houwen, B.P. Sommeijer and J.J.B. de Swart
Parallel predictor–corrector methods 53

CONTRIBUTED PAPERS

D.D. Ang, A. Pham Ngoc Dinh and D.N. Thanh
An inverse Stefan problem: identification of boundary value 75

D. Bessis
Padé approximations in noise filtering 85

A. Böttcher and H. Wolf
Polynomial collocation over massive sets for Toeplitz integral equations on the Bergman space 89

L. Brugnano and D. Trigiante
Convergence and stability of boundary value methods for ordinary differential equations 97

A.J. Carpenter
Scientific computation on some mathematical problems 111

J.M. Chuang and S.Z. Hu
Numerical computation of Muskhelishvili's integral equation in plane elasticity 123

C.R. Costian and D.C. Marinescu
A distributed memory algorithm for 3-D FFTs 139

G. De Samblanx, M. Van Barel and A. Bultheel
Duality in vector Padé–Hermite approximation problems 153

K. Diethelm
A definiteness criterion for linear functionals and its application to Cauchy principal value quadrature 167

S. Ehrich
A note on Peano constants of Gauss–Kronrod quadrature schemes 177

P. Feinsilver and R. Schott
Operator calculus approach to orthogonal polynomial expansions 185

J.A. Ford and I.A. Moghrabi
Using function-values in multi-step quasi-Newton methods 201

N.J. Ford and C.T.H. Baker
Qualitative behaviour and stability of solutions of discretised nonlinear Volterra integral equations of convolution type 213

S. González-Pinto, J.I. Montijano and L. Rández
Improving the efficiency of the iterative schemes for implicit Runge–Kutta methods 227

T.N. Grapsa and M.N. Vrahatis
A dimension-reducing method for unconstrained optimization 239

P.R. Graves-Morris, G.A. Baker Jr. and C.F. Woodcock
Cayley's theorem and its application in the theory of vector Padé approximants 255

M. Griebel and T. Neunhoeffer
Parallel point- and domain-oriented multilevel methods for elliptic PDE's on workstation networks 267

S.N. Hanna, M.N. Abdel-Malek and M.B. Abd-el-Malek
Super-critical free-surface flow over a trapezoidal obstacle 279

H. Janssen and R. Van Dooren
Application of high-order difference methods for the study of period doubling bifurcations in nonlinear oscillators 293

X.-Q. Jin
Fast iterative solvers for symmetric Toeplitz systems – A survey and an extension 315

R. Klempous, J. Kotowski and E. Szlachcic
Interactive procedures in large-scale two-dimensional cutting stock problems 323

A. Korzeniowski
On computer simulation of Feynman–Kac path-integrals 333

D.P. Laurie
Periodizing transformations for numerical integration 337

D.W. Lozier
Software needs in special functions 345

M. Morandi Cecchi, M. Redivo-Zaglia and G. Russo
Extrapolation methods for hyperbolic systems with relaxation 359

P. Moszkowicz, J. Pousin and F. Sanchez
Diffusion and dissolution in a reactive porous medium: Mathematical modelling and numerical simulations 377

N. Osada
Vector sequence transformations for the acceleration of logarithmic convergence 391

H.R. Parks and J.T. Pitts
The least-gradient method for computing area minimizing hypersurfaces spanning arbitrary boundaries 401

K.C. Posch and R. Posch
Division in residue number systems involving length indicators 411

J. Rovder
On monotone solution of the third-order differential equation 421

P. Sablonnière
Quasi-interpolants associated with *H*-splines on a three-direction mesh 433

B. Simeon
On the numerical solution of a wheel suspension benchmark problem 443

V. Simoncini and E. Gallopoulos
A hybrid block GMRES method for nonsymmetric systems with multiple right-hand sides 457

R.C. Strawn and R. Biswas
Numerical simulations of helicopter aerodynamics and acoustics 471

T. Styś
$O(\tau^2 + h^4)$ finite difference scheme for decoupled system of two quasilinear parabolic equations 485

H. Swann
Error estimates using the cell discretization method for some parabolic problems 497

A. van der Ploeg, E.F.F. Botta and F.W. Wubs
Nested grids ILU-decomposition (NGILU) 515

R. Van Dooren and H. Janssen
A continuation algorithm for discovering new chaotic motions in forced Duffing systems 527

L. Vozovoi, M. Israeli and A. Averbuch
Multidomain local Fourier method for PDEs in complex geometries 543

S.-N. Yang and W.-C. Du
Numerical methods for approximating digitized curves by piecewise circular arcs 557

J.Y. Yuan
Numerical methods for generalized least squares problems 571

List of papers presented at the congress 585
